

Funding Product Matrix for Brokers

Route MCA, LOC, equipment, AR, credit builder, term loan, SBA-style, inventory, and revenue-based offers by borrower problem - not by habit, panic, or commission breath.

How brokers should use it 1. Identify use of funds. 2. Match repayment source. 3. Check urgency and docs. 4. Score product fit 1-5. 5. Route to review - not instant promises.	Product fit score 1 Poor fit 2 Weak fit 3 Possible fit 4 Strong fit 5 Best initial route	Human review required when Stacked advances, low balances, unclear use of funds, declining revenue, tied scores, risky repayment pressure, or borrower expects guaranteed approval.
--	---	---

Product	Best When Borrower...	Watch For	Next Broker Move
MCA	Needs fast short-term cash and has consistent sales.	Stacked advances, low balances, thin margins.	Review cash-flow impact first.
LOC	Needs repeat access for working capital, payroll timing, or seasonality.	Plans to max it immediately or lacks draw discipline.	Compare recurring need vs one-time need.
Equipment	Needs vehicle, tools, machinery, kitchen, or medical equipment.	Funds are really for payroll, rent, or vague cash gaps.	Get quote/invoice and route as asset financing.
AR / Invoice	Has unpaid B2B invoices and needs cash before customers pay.	Disputed/old invoices or weak customer concentration.	Request AR aging and invoice samples.
Credit Builder	Is not ready for larger funding and needs fundability prep.	Wants emergency cash or guaranteed credit lines.	Route to readiness/nurture path.
Term Loan	Has stable cash flow and a defined project or refinance need.	Same-day need, weak docs, unstable revenue.	Prepare financial packet.
SBA-style	Can wait and document a larger strategic use of funds.	Incomplete records or unrealistic timeline.	Start document review early.
Inventory	Needs stock before revenue arrives and has real sales history.	Dead inventory, thin margins, hope-based demand.	Review forecast and margin math.
Revenue-Based	Has predictable revenue and a growth use case.	Volatile revenue or inflated projections.	Model repayment against cash flow.

Core intake questions What is the money for? When is it needed? How will repayment be supported? What debt already exists? Are there invoices, equipment, inventory, or documents available now?	Safe language Use: may fit, could be considered, eligibility varies, terms depend on review, not a guarantee. Avoid: approved, guaranteed funding, everyone qualifies, no risk.
